WEATHER SYNOPSIS BY REGION

NORTHERN CALIFORNIA

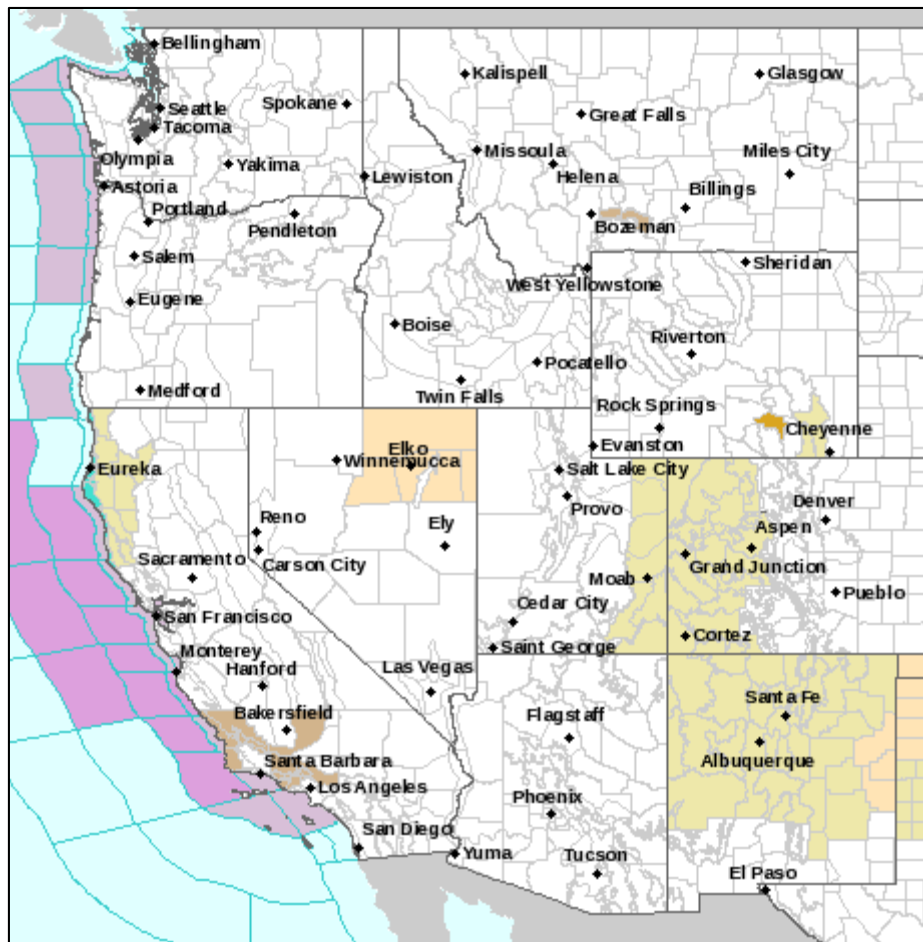

- *** The next update of this product will be Thursday, 12/06/18. ***
- An unsettled weather pattern will continue over the region into next week.
- One weather system off shore will arrive/pass through today/Wed with relatively light precipitation across the Geographic Area.
- Thursday through Saturday night are expected to be rather dry under a passing high pressure ridge with another, moderately wet weather system arriving for later Sunday into Monday.
- The lowest snow levels now appear likely to be 3,500-4,000 ft over the next 7 days.
- Some gusty N to E winds will be in place today into early Wednesday, mainly along and west of the Coast Range crest. Gusts of 25-35 mph are expected, locally to around 40 mph possible. Lighter winds will follow for a few days before picking up again quite a bit this weekend.
- Temperatures will be close to seasonal normals in all areas with the warmest locations generally near 60 for highs and mid 40s for lows.

SOUTHERN CALIFORNIA

- A low pressure area will approach the Central California Coast today and then hug the Central California coast Wednesday before dropping south Thursday. This low pressure area will move inland over Northern Baja Friday morning. A weak ridge of high pressure will build into the region Friday through this weekend. A Pacific trough will drop down the West Coast early next week.
- Showers will develop over the Central California Coast this afternoon and then spread across the rest of Central California this evening. Showers will develop across Southern California Wednesday morning. Showers will end across the region from north to south throughout the day Thursday.
- Most locations will receive between 0.50 and 2 inches of rainfall through Thursday.
- The snow level will be around 6,000 feet.
- Local northeast to east winds of 10 to 20 mph will surface across Southern California through this evening.
- Temperatures will be near to a little below normal today, with 40s to low 50s across the mountains and mid 50s to upper 60s in the valleys.
- Minimum humidity will be mainly between 15% and 30% across Southern California today.
- Temperatures will cool to the mid 30s to mid 40s across the mountains and 50s to low 60s in the valleys Wednesday and Thursday.
- A slow warming and drying trend will occur Friday through this weekend.
- Showers with light to moderate rainfall totals will spread from north to south early next week and temperatures will drop to 5 to 10 degrees below normal early next week.
